There is a new tree for each ore as well as for some blocks. This mod is great for people who don't like to spend a lot of time mining. It is also well balanced and requires some work to get ore after felling down trees. It's a fantastic way to acquire a huge amount of all the ores in the game. If you want to skip mining but don't want to succumb to going into creative mode, then this mod is the perfect way to maintain a stable supply of ore as well as put in some work. Screenshots: Create recipes: To create seedlings, you should use blocks of ore and seedlings as below (you can use any seedlings of gold = Golden blocks, etc.): XP trees have a different recipe: Next you need to work out transformers. There are 3 types of transformers: Normal, Nether and Enhanced Next you need to create logs. To make them, you need to use chops that are collected by cutting wood: To get the final resources from the logs, you need to use Transformers. Surround them with logs. Ore that spawned in another: Quartz and Glowstone needs Nether Transformer, Obsidian needs an enhanced transformer and everything else needs normal. Transformers are not destroyed. You can also develop less than 8 resources: 7 decks – 7 diamonds, 6-6, 5-5, 4-4, 3-3, 2-2, 1-1. If you want to give rise to bosses, first you need their caviar. To make caviar, you will first need the frame of the illuminator. The caviar itself needs parts of caviar to get these parts, you need to kill withered. 1 Kill gets you one part. After receiving the illuminator frame, work it out with logs: You can also create special ppples, just use the right kind of decks. About updates and known bugs: By Month | May 13, 2017 | 25,611 views Are you sick tired of finding resources and mining? Then this mod is for you! Tree Ores Mod 1.12.2/1.11.2 for Minecraft can make Ores appear right on the tree; players can easily collect them without having to go to dig them out of the deep underground more! Mine once and get tree ores and have them almost endlessly! TreeOres, as the name suggests, allows plants to grow ore in their wood (e.g., iron ore, gold ore, etc.). However, trees do not just grow ore. First, players must craft ore tree seedlings and start building up a ore farm. After that, you must use the specified to make and extract the ore you need. Of course, to keep the balance of gameplay, a recipe for seedlings will be very expensive (costing blocks of ore, not ingots), you can replace the gold block in the recipe to have gold seedlings: To craft seedlings, you need to blocks of ore and seedlings, both at the bottom (you can use any seedlings. gold seedlings = Golden blocks, etc.): XP trees have a different recipe: Next you need to work out transformers.
